

SPEECH MAGAL 2022 CALL

In the Qur'an, God says: "We have certainly created man in the most perfect form" (S95 V4) and He adds: "Then We have brought him down to the lowest level" (S95V5)

Let us try to reflect deeply on the content of these verses. For their content is nothing but the truth. It is true that God's mercy is limitless, that the favours of Serigne Touba are unlimited. But the content of these verses is the rule that God has established and this is what He says. In truth, if we redouble our efforts, the favours will come to us continuously and in full. But if we refuse to redouble our efforts, we will fall back again and again to the point of being at the bottom. Everyone shares it. But no one has a greater share than we do because of Serigne Touba's conduct towards God. His behaviour towards Him was very exemplary. He was even with all those with whom he shared God. He gave them all their rights in an absolute way while remaining with God.

All that I have just said should force us to review our behaviour. If we redouble our efforts on our way of being in the city, living in the way that Serigne Touba wants, we will have bliss here below and in the hereafter, internal and external reform and preservation today and tomorrow. If we do not do this, all that any of us will see is that he is not blaming anyone but himself. And that is only his own carelessness.
